Q: Google Cloud Function - How to invoke Google API with user credentials I'm using a Google Cloud Function to make an API call to google. I'm using Http trigger function and setting up the JSON parameters like this: { "http": { "method": "get", "path": "/...", "headers": { "Authorization": "Bearer {MY\_TOKEN\_HERE}" } }, "p": { "id": "...", "mainObject": { "num": "..." } } } The problem is, the authorization is not working, I get a "Unauthorized". If I delete the authorization part from the headers, the request works. But I need to authorize the user so I need a the "Authorization" part in the headers. Can anyone help on what am I doing wrong? Thank you A: Since you're using a Service Account, you need to add the "type": "service\_account" parameter into the serviceAccountScopes object inside config, as indicated in the following link: The correct syntax would be: const scopes = [
